The project team will accept no responsibility or liability for investor loss that arises from investment.

# Overview

The Pulsinator project been created to distribute maximum rewards to Investors looking for value on the Binance Smart chain & Maxx Chain Blockchains.

The projects aim to move past the typical crypto project ceiling by developing use case and revenue generating utility through leveraging Vault Finances Pulse trading platform, marketing initiatives and NFT utilities.

Pulsinator BSC & Pulsinator Maxx tokens are both part of the Reward Miner Coin project network.

The goal is to build the foundation for long term sustainable success and then **Renounce contract ownership** and facilitate hand over to community operation via a NFT ownership collection.

**Blockchain:** BSC

**Max Supply:** 2 Million (2,000,000)

Tax structure:

**Buys & Sell Taxes 10%**

- **USDT** rewards: **4%**
- Marketing/Pulse: **4%**
- RMC Network: **2%**

**Blockchain:** Maxx Chain (Yet be Launched)

**Max Supply:** 2 Million (2,000,000)

Tax structure:

**Buys & Sell Taxes 10%**

- **USDT** rewards: **4%**
- Marketing/Pulse: **4%**
- RMC Network: **2%**

- Maxx Chain Liquidity Pair: - To be confirmed.
- Pulse VIP Trading Account: - 0xc7E51e4DfA4A039Bd3a3708022509c0D44022e9f

# Project Pulse Trading Platform Account

The Pulsinator Project will setup a Pulse Trading platform account. Pulse is a Trading platform operated by the Vault Finance project. Pulse when launched will earn daily compounding profits on invested capital with projections within the range of 0.5-2.5% per day.

How will the Projects Pulse Trading account be funded:

- 4% of the Pulsinator BSC & Pulsinator Maxx tokens Buy and Sell taxes.
- 50% of USDT Rewards earned Monthly off the Lottery NFT Rewards Pool wallets on both Pulsinator BSC and Pulsinator Maxx Chain.
- 30% of the profits from each contract cycle.

How will the Projects Pulse Trading account profits be used:

**Each Month 70% of the profits earned from the Pulsinator Pulse Trading account will be withdrawn and distributed via the below Percentage Breakdown:**

✓ 40% of the Pulse USDT account profits will facilitate a USDT prize pool that the 500 Pulsinator Lottery NFT holders and 50 Pulse Boost NFT holders can win every contract cycle.

- This prize pot will be shared between 60 NFT holders.
- Pulse Boost NFT holders will receive 2 entries into the draw per NFT.

✓ 20% of the Pulse USDT account profits will be used to buy Pulsinator tokens that will be distributed to the Pulsinator Lottery Rewards pool wallet.

✓ 20% of the Pulse USDT account profits will be used to buy Pulsinator Boost tokens that will be distributed to the Pulsinator Boost NFT rewards pool wallet.

✓ 20% of the Pulse USDT profits will be sent to the marketing & operations wallet.

**The other 30% of the profits earned on the Pulsinator Pulse trading account will be left in the account to compound/scale future profits.**

## Staking Platform

A staking platform will be deployed which will allow Pulsinator Investors the capacity to earn rewards on their Pulsinator BSC and Pulsinator Maxx Holdings.

A staking NFT collection is available. It will be necessary to own this Staking NFT to earn Staking APR benefits and Monthly NFT Holder Rewards in USDT against the projects trading volume.

- 3 Month Staking Pool Period
- Concurrent Staking APR (Variable) & USDT Rewards
- Early Withdrawal Penalty: 25%

## Pulsinator Lottery NFT Prize Pool Utility

Pulse Lottery NFT & Pulse Boost NFT owners will go into a draw to win a share of a USDT Lottery prize pool at the end of each Pulse account cycle.

The size of these USDT Lottery NFT prize pools will compound over time against project trading volume and USDT rewards earned on the Lottery NFT rewards pool wallet & the profits from the Pulsinator projects Pulse trading account.

The winners will be drawn via live AMA using the Duck Race App to randomise the draw to make it fair for all. You must hold a **Pulsinator Lottery NFT** to be eligible to win a share of the monthly prize pool.

Bonus Lottery NFT draws will be held from time to time to provide additional rewards to the Lottery NFT and Pulse Boost NFT holders.

## Lottery NFT Rewards Pool Wallet

The NFT Rewards pool wallet is a large consolidated wallet in the project on both Pulsinator BSC and Pulsinator Maxx chain tokens that earn USDT Rewards. These rewards will be used to form a USDT prize pot for Pulsinator Lottery NFT holders to win and boost the trading balance of the Projects Pulse trading account.

Wallet Address BSC: 0x58E12F7483527D2361c39de7E5c964f7F94BEDeA

Wallet Address Maxx Chain: 0x58E12F7483527D2361c39de7E5c964f7F94BEDeA

These wallets will build over time as 20% of the profits from the projects Pulse trading account will be used to buy tokens on each blockchain that will be distributed to these wallet Lottery Rewards Pool wallets.

Once this wallet hits 150,000 tokens.

- 25,000 tokens will be burned
- 25,000 tokens will be sent to the Staking pool wallet to replenish staking pool rewards.

This will assist the project in the following ways:

- Boost the use case of the Pulsinator Lottery NFT collection
- Boost the balance of the projects Pulse trading account
- Lock a larger chunk of the supply away to create a more stable price floor for the project as time goes on.
- Facilitate mass burns of supply once this wallet reaches 150,000 tokens.
- Replenish the staking pool to make the staking rewards offered long term sustainable.

# Boost Digital Wallet Utility

Through a project merger the Pulsinator project acquired a Digital wallet utility from Nano Network. This utility is presently being rebranded before it is going to be launched under the Boost wallet branding.

## Key Wallet Features:

- Auto Staking
- Honeypot checker

## Future Features

- Gift Card Purchase
- Games & Rewards module
- AMA Streaming Centre

## Pulsinator Lottery NFT

Includes:

- NFT
- Opportunity to be 1 of 60 winners to share from a USDT prize pot facilitated by the following:
  - 50% of the USDT rewards earned off the NFT Rewards pool wallet
  - 40% of the USDT profits from the projects Pulse trading account.

Cost: **2 BNB Each (SOLD OUT)**

Max Limit: 500

## Pulsinator Staking NFT

Includes:

- NFT
- Staking Platform Access for Pulsinator BSC and Pulsinator Maxx tokens.
- Earn concurrently Pulsinator tokens and USDT Rewards on Pulsinator BSC staked holdings.
- Earn concurrently Pulsinator tokens and USDT Rewards on Pulsinator Maxx staked holdings.

Cost: **3 BNB Each**

Current Limit: 200

## Boost Digital Wallet NFT

Includes:

- NFT
- 25% rebate of Pulsinator BSC tokens - Less buy taxes
- 25% rebate of Pulsinator Maxx chain tokens - Less buy taxes
- **Reward Miner Coin (RMC)** token rewards facilitated by 50% of the USDT rewards earned from the Boost Digital wallet NFT Rewards pool wallets
  - (0x933466721e0646527b0186e3c8cedc7d31d1fa8c)

Cost: **1 BNB Each**

Max Limit: 1000

## Pulsinator Boost NFT

Includes:

- NFT
- Guaranteed Pulse Trading Account Contract renewals
- Opportunity to be 1 of 60 winners to share from a USDT prize pot facilitated by the following:
  - 50% of the USDT rewards earned off the NFT Rewards pool wallet
  - 40% of the USDT profits from the projects Pulse trading account.
  - Each Pulsinator Boost NFT holder gets two entries into each Lottery draw per NFT
- **Reward Miner Coin (RMC)** token rewards facilitated by 50% of the USDT rewards earned from the Pulse Boost NFT Rewards pool wallets
  - (0xc4e16463c28d596d590523f1d66df007540e5cd1)
- Access to Special Offers

Cost: **10 BNB Each (SOLD OUT)**

Max Limit: 50

# Pulsinator Elite Investor Committee

The Pulsinator Elite Membership body is a community of our largest holders.

## Pulsinator Elite Membership Qualification:

- 10,000 Pulsinator BSC or 10,000 Pulsinator Maxx Chain tokens

## Membership Benefits:

- Access to the Pulsinator Elite private channel on Telegram
- Executive voting privileges on all project initiatives.
  - 1 vote per 10,000 plus Pulsinator token wallet
  - 1 vote per 10,000 plus Pulsinator Boost token wallet
- Early intel on Project developments and promotions
- VIP special offers.
- Access to bonus staking pool.
- Priority access to the Project ownership NFT collection when launched.

# Contract Audit

InterFi Network  
Audit

The Pulsinator BSC  
& Pulsinator Maxx  
Contracts have  
been Audited by  
InterFi Network.

# PROJECT ROADMAP

## Phase 1:

- Pulsinator BSC Relaunch on Pancake Swap
- Website Redesign
- Update dApp Dashboard

## Phase 3:

- Launch Staking pools
- Launch Farm-Bonds pools
- Build Pulse Trading Account

## Phase 5:

- Community Management Handover
- Renounce Contract Ownership

## Phase 2:

- Launch Pulsinator Maxx Chain
- Coin Market Cap Listing
- Coin Ghecko Listing

## Phase 4:

- NFT Project Ownership Collection Launch
- Exchange Listings
